Research on Alcohol and HIV

Join us for the 3rd annual satellite meeting of Research on Alcohol and HIV. The objective of this meeting is to present updates on alcohol research among people living with HIV from several large NIAAA-funded HIV and alcohol consortia. We will present data from across the research spectrum including data from both domestic and international cohorts.

Hosted by

National Institute on Alcohol
Abuse and Alcoholism

Please register to attend by **May 1, 2024**
<https://redcap.link/METARSA2024>

Participation is free of charge but will be limited to the first 100 registrants. If you would like additional information or have questions regarding the satellite meeting, please contact Emily Smith at emily.k.smith@vumc.org.

Research on Alcohol and HIV Satellite Meeting

9:00 Kendall Bryant	NIAAA Welcome and Updates	12:10	Lunch and Poster Session
9:30 Session 1	Enhance discovery and advance HIV-science	1:00 Session 3	Optimization of public health impact
Patricia Molina	Immuno-metabolic mechanisms of alcohol-associated metabolic instability and their contribution to aging comorbidities (<i>LSU</i>)	Scott Braithwaite	Projected impact of scaling alcohol misuse intervention on the Zimbabwean HIV pandemic (<i>NYU</i>)
Adolf Pfefferbaum	Tracking aging of regional thalamic volumes in HIV with and without AUD comorbidity (<i>SRI International</i>)	Neo Morojele	Motivational interviewing and problem-solving therapy intervention for patients on antiretroviral therapy for HIV (<i>University of Johannesburg</i>)
Christopher Rentsch	Receipt of glucagon like peptide-1 (GLP) Receipt of glucagon-like peptide-1 (GLP-1) receptor agonists is associated with reduced alcohol consumption in people living with and without HIV (<i>VACS</i>)	Jennifer Edelman	Contingency management with stepped care for unhealthy alcohol use among individuals with HIV (<i>VACS</i>)
11:00 Session 2	Advance the development and assessment of novel interventions	2:30 Session 4	Build research workforce and infrastructure capacity: ESI highlight
Lesley Harris	"I want to do this for myself": Qualitative Exploration of the Mechanisms of SBIRT for PrEP Users Engaged in Moderate to High-Risk Alcohol Use (<i>University of Louisville</i>)	Mollie Monnig	Cytokine dynamics under low and moderate dose alcohol in light and heavy drinkers: a randomized controlled trial (<i>Brown University</i>)
Paul Shuper	Brief alcohol e-intervention reduces hazardous alcohol use and improves PrEP adherence among MSM: results from a randomized controlled trial (<i>CAMH</i>)	Mark Britton	Cortical GABA recovery during alcohol abstinence is attenuated by HIV (<i>UFL</i>)
Amy Conroy	Pilot study results: An economic and relationship-strengthening intervention to address heavy drinking and HIV-treatment adherence in Malawi (<i>UCSF</i>)	Natalia Van Doren	Syndemic Clusters of Alcohol Use and Multimorbidity among People with HIV (<i>UCSF</i>)
		4:00	One-on-one mentoring sessions
		4:00 - 5:30	Networking Happy Hour
