

Digestive Diseases Research Center Academy of Investigators Workshops 2024-2025

A Career Development Workshop series, which is part of the Vanderbilt DDRC enrichment program. The goal of the series is to support trainees' and junior faculty members' knowledge base and comfort level in dealing with the "non-science" aspects of a career in academic medicine. The group meets on the third Tuesday of every month during the academic year in MRB IV, Room 10455, from noon to 1 pm. This is a lunch-meeting format with guest speakers to discuss various topics.
